

HAFIZ MUHAMMAD USMAN

+92 304-4908700 | Lahore, Pakistan | usmaniqbal036@gmail.com

EDUCATION

University of Sargodha — BS, Information Technology 2018

Lahore Board — Intermediate of Commerce (I.Com) 2014

Lahore Board — Matriculation 2012

CERTIFICATIONS

- Web Development — Lahore Institute of Technical Education
- Full Stack JavaScript Development – Excellence Delivered EXD Pvt Ltd (Currently Enrolled)

SKILLS

Languages: JavaScript, Java, C, C++, C#

Web Technologies: React.js, Context API, Node.js, Express, HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap

Databases: MySQL, MongoDB, MongoDB Atlas

Tools & IDEs: VS Code, IntelliJ IDEA, NetBeans, MS Visual Studio, XAMPP, GitHub

Productivity: MS Word, MS Excel, MS PowerPoint, Windows OS

PROJECTS

Task Manager | Full-Stack Web Application

React.js, Express, Node.js, MongoDB Atlas, GitHub

- Built a full-stack task management application with a React.js front end and a Node.js/Express REST API backed by MongoDB Atlas
- Implemented core task workflows — creating, updating, completing, and deleting tasks — with data persisted in the cloud via MongoDB Atlas
- Structured the codebase into reusable React components and organized Express routes/controllers for maintainable API design

Todo Messages | Full-Stack Web Application

React.js, Express, Node.js, MongoDB Atlas, GitHub

- Developed a to-do and messaging application combining task tracking with a lightweight messaging feature, using React.js on the front end
- Built RESTful APIs with Express and Node.js to handle CRUD operations for to-do items and messages, backed by MongoDB Atlas
- Managed application state and API integration between the React front end and the Node/Express back end for real-time updates

Wares E-Commerce App | Full-Stack Web Application (In Progress)

React.js, Express, Node.js, MongoDB Atlas, GitHub

- Developing a full-stack e-commerce platform with a React.js storefront and an Express/Node.js API connected to MongoDB Atlas
- Building core commerce features including product listings, cart management, and order handling
- Currently a work in progress, being used to strengthen skills in full-stack MERN development and API design

My Profile | Front-End Web Application

React.js, JavaScript, HTML5, CSS3, GitHub

- Built a personal profile/portfolio web application using React.js, JavaScript, HTML5, and CSS3
- Designed a clean, responsive layout to showcase personal information, skills, and projects
- Version-controlled and published the project source on GitHub

Movie Discovery App | *Front-End Web Application*

React.js, JavaScript, CSS3

- Built a responsive movie discovery application using React.js, displaying detailed movie information from structured sample data
- Implemented component-based routing and reusable components to present movie listings and detail pages with a clean, consistent UI
- Focused on component-based architecture to keep the codebase organized and easy to extend

E-Commerce Shopping Cart | *Front-End Web Application*

React.js, Context API, JavaScript, CSS3

- Developing an e-commerce shopping cart platform using React's Context API for global state management
- Implementing core cart functionality including adding/removing items, quantity updates, and price calculation without prop drilling
- Currently a work in progress, being used to strengthen understanding of state management and component communication in React.js

Repair Wala | *Home-Appliance Repair Service Platform — Team Lead*

Java, JSP, MySQL, HTML5, CSS3, Bootstrap, IntelliJ IDEA

- Led a small team as Team Lead through data gathering, front-end, and back-end development of a desktop application connecting customers with doorstep home-appliance repair services
- Designed core modules for service requests, technician assignment, and parts tracking to speed up service delivery and support better decision-making for the business
- Built the back end with JSP and MySQL to manage customer, service, and parts data reliably

Hotel Management System | *Desktop Application*

Java, MySQL

- Built a desktop-based system to manage hotel operations, including guest reservations, billing, and customer records
- Implemented core CRUD workflows so staff could track room occupancy and bookings efficiently, replacing manual record-keeping

EXPERIENCE

Data Entry Operator *Dec 2020 – Present*

Hepatitis & Infection Control Program, Primary & Secondary Healthcare Department — Lahore, Pakistan

- Perform accurate, high-volume data entry supporting a province-wide public health surveillance program
- Analyse large datasets to identify trends and support official reporting for the Hepatitis & Infection Control initiative
- Coordinate with program teams under time-sensitive conditions, maintaining data integrity and consistently meeting submission deadlines

ADDITIONAL INFORMATION

- Comfortable working under pressure and managing tasks across concurrent priorities
- Experience coordinating small teams and dividing project responsibilities effectively
- References available on request
